

Dear Sirs, I listen to a radio station "KLOVE" that is currently using translator service to reach our rural area. KLOVE is very inspiring and and welcome in our community. KLOVE links us with the world. Many lives are touched every day in a great way by this station. I believe that if a LPFM replacement station would have a very hard time covering the area of KLOVE because of the mountains here in WV. Please be very careful about making space to LPFM stations in our area. Thank You
